

Content

Chapter One

Sets and Real Number System

1.1	Introduction	2
1.2	Set Representation	2
1.3	Some Special Sets	3
1.4	Venn Diagram	5
1.5	Set Operations	6
1.6	Number of Elements Contained in a Set	11
	□ <i>Exercise 1(A)</i>	14
1.7	Real Numbers	22
1.8	Inequalities	25
1.9	Intervals	26
1.10	Absolute Value	27
1.11	Half-plane	30
1.12	Ordered Pairs	33
1.13	Cartesian Product	33
1.14	Relation	33
	□ <i>Exercise 1(B)</i>	35
	□ <i>Key Terms</i>	39
	□ <i>Review Problems</i>	40

Chapter Two

Functions and Graphs

2.1	Introduction	43
2.2	Definition	43
2.3	Domain and Range	45
2.4	Types of Functions	48
2.5	Inverse Function	50
2.6	Composite Function	51
2.7	The Graph of a Function	52
2.8	Construction of Functions	54
2.9	Zeros (or Roots) of a Function	55

2.10	Polynomial Functions	55
2.11	Rational Function	60
2.12	Some Important Functions	60
2.13	Break-even Analysis	61
	□ <i>Exercise 2(A)</i>	63
2.14	Exponential Functions	71
2.15	Logarithms	75
	□ <i>Exercise 2(B)</i>	77
	□ <i>Key Terms</i>	80
	□ <i>Review Problems</i>	81

Chapter Three

Limit and Continuity

3.1	Introduction	84
3.2	Sequence	84
3.3	Limit of a Sequence	86
3.4	Limit of a Function	86
3.5	Limit Theorems	89
3.6	Limit of a Polynomial Function	90
3.7	Limit of a Rational Function	90
3.8	Infinity and Limits	90
3.9	Some Important Limits	91
3.10	Techniques of Finding Limits	91
3.11	Continuity	95
3.12	Continuity at a Point	95
	□ <i>Exercise 3</i>	97
	□ <i>Key Terms</i>	102
	□ <i>Review Problems</i>	103

Chapter Four

The Derivative

4.1	Introduction	105
4.2	The Slope of a Straight Line	105
4.3	The Slope of a Curve at a Point	106
4.4	Rules of Differentiation	107

4.5	Higher Order Derivatives	115
	❑ <i>Exercise 4 (A)</i>	115
4.6	Increasing and Decreasing Functions	121
4.7	The Derivative as a Rate of Change	122
4.8	Describing Graph of a Function	124
4.9	Optimization Problems	127
	❑ <i>Exercise 4 (B)</i>	133
	❑ <i>Key Terms</i>	138
	❑ <i>Review Problems</i>	138

Chapter Five

Polynomial Functions and Quadratic Equations

5.1	Polynomial Functions	141
	❑ <i>Exercise 5 (A)</i>	143
5.2	Polynomial Equations	144
	❑ <i>Exercise 5 (B)</i>	149
5.3	Condition for Common Roots	152
	❑ <i>Exercise 5 (C)</i>	155
	❑ <i>Key Terms</i>	157
	❑ <i>Review Problems</i>	157

Chapter Six

Permutation and Combination

6.1	Fundamental Principle of Counting	160
6.2	Addition Principle	160
6.3	Factorial Notation	160
6.4	Permutation	161
6.5	Combination	165
	❑ <i>Exercise 6</i>	167
	❑ <i>Key Terms</i>	172
	❑ <i>Review Problems</i>	172

Chapter Seven

Mathematics for Finance

7.1	Introduction	174
7.2	Interest	174
	❑ <i>Exercise 7 (A)</i>	181
7.3	Depreciation	183
	❑ <i>Exercise 7(B)</i>	184
7.4	Annuities and their Future & Present Values	186
	❑ <i>Exercise 7 (C)</i>	191
	❑ <i>Key Terms</i>	195
	❑ <i>Review Problems</i>	196

Appendix	198
Syllabus	215
PU Board Questions	217
References	244
